

General information about AJ Energy & Bedding

The rape straw bedding comes in different variations. The products are Danish processed, heat treated, with minimal dust, bacteria-free and with many uses. Rape bedding is a natural product. The bedding is extremely absorbent, which means that the surface is always dry, and this results in a better environment in the stable. The bedding may be used for pigs, cows, chickens/hens, mink, sheep, horses and pets. It can be used almost anywhere and often with great results in terms of **time/quantity/economy** – compared to shavings or regular straw.

AJ-Strømel is unique as bedding in piglet creep areas

- Heat treated
- Danish SPF-Approved
- Purely natural
- Extremely absorbent, dry bedding area and less infections
- Strømel remains in the applied area
- Very soft material, lower the risk of small cuts
- Strømel minimizes umbilical hernia and joint inflammations
- Better health
- Binds ammonia smell
- Better environment
- Does not stick to concrete, easier cleaning
- Provides a homogeneous slurry
- Easily decomposed
- **Annual consumption approximately 4 kg each litter of piglets/creep area.**
- Approved for rooting and occupational material

AJ-Kross Grov is suitable as litter and rooting material for pigs, sows and slaughter pigs. It is also well used in deep litter/relief pens.

- Heat treated
- Danish SPF-Approved
- Purely natural
- Extremely absorbent, dry bedding area and less infections
- Effective against tail bites
- Well against ear- and flank bites
- Inverted lying area
- Better health
- Binds ammonia smell
- Better environment
- Does not stick to concrete, easier cleaning
- Provides a homogeneous slurry
- Easily decomposed
- Approved for rooting and occupational material

A DRY AND GREEN ENVIRONMENT DOES WELL FOR ANIMALS AND HUMANS
